Steamatic of Sacramento
HEALTHY HOME SERVICES™
Improving Indoor Air Quality

S.O.S. now offers Healthy Home Services.

S.O.S. provides an array of services to improve indoor air quality. Our trained personnel can assess individual needs.

- Crawl space drying and remediation. Damp, contaminated crawl spaces can severely degrade air quality in a home. S.O.S. is now the regional provider for CleanSpace crawl space encapsulation systems.
- Professional cleaning of all surfaces in a home including carpets, upholstery and walls.
- NADCA-certified air duct cleaning **
- Attic remediation - pigeon/rodent problems
- Moisture intrusion investigations utilizing an infrared camera and other high-tech equipment
- Concrete slab moisture measurement

Steamatic of Sacramento (S.O.S.) is an IICRC-certified firm* and incorporates the most current industry standards in the provision of our services.

S.O.S. has the personnel and affiliations to handle your SOS or to improve indoor air quality in your home. The principle employees at S.O.S. have more than 80 years of combined experience in the restoration field. Our trained technicians are IICRC-certified. Partnerships with Steamatic Inc. and other restoration companies help S.O.S. handle large-scale losses.

S.O.S. professional trade group affiliations include the Association of Specialists in Cleaning and Restoration (ASCR); the National Institute of Disaster Restoration (NIDR); the Water Loss Institute (WLI); the Institute of Cleaning and Restoration Certification (IICRC); and the National Air Duct Cleaning Association (NADCA).

Steamatic of Sacramento has a California general building contractor's license No. 697339 and a speciality license for cleaning air ducts.

Steamatic of Sacramento's senior staff includes two certified restorers who are qualified in Superior and Federal Court as experts in cleaning and restoration.

Indoor Air Quality & Contaminant Reduction

Mold grows on surfaces like drywall and baseboard dampened by a direct water source or from humid air.

- Moisture control is the key to mold control. When water leaks or spills occur indoors, act quickly to dry wet materials or areas of the building.
- Keep indoor humidity below 60 percent. Use air conditioners and/or dehumidifiers when needed.
- Open windows or use exhaust fans when using the bathroom and kitchen.
- If wet surfaces are dried within 24 to 48 hours after a leak, mold won't grow in most cases.

Dust Mites are tiny bugs you can't see. They live in sheets, blankets, pillows, mattresses, soft furniture, carpets and stuffed toys.

- Wash bed sheets, stuffed toys and blankets once a week. Dry completely.
- Vacuum carpets, rugs and furniture often.
- Clean carpets and air ducts regularly.

Secondhand Smoke can trigger asthma and other serious health problems for children and adults.

- Don't smoke in your home or car.
- Keep family or visitors from smoking in your home.

Cockroach body parts and droppings may trigger asthma attacks.

- Clean dishes, crumbs and spills.
- Store food in air tight containers.

Dogs and Cats A warm-blooded animal's urine and saliva may trigger asthma attacks.

- Keep pets outside if possible.
- If you have indoor pets, keep them out of the bedroom and off the furniture.
- Bathe and groom pets regularly.

Emergency Tips

Water Damage

- Turn off water source and contact plumber, if repairs are needed.
- If there is no risk of electrical shock, turn off circuit breaker supplying electricity to affected areas.
- Elevate wood and metal furniture to prevent contact with wet floor, using aluminum foil or non-staining wooden blocks.
- Elevate the bottom of draperies and furniture skirts to prevent contact with wet floor coverings.
- Remove shoes, clay pots and printed materials from carpet to prevent color bleed through.
- Contact S.O.S. to perform the water extraction and structural dry down.

Fire and Smoke

- Turn off air conditioner, fan or heater system immediately.
- Change the filter before use if you must use the air conditioning, fan or heating system.
- Do not touch or sit on upholstered furniture.
- Empty refrigerator/freezer of all food if you are without electrical power.
- Secure household from weather, vandals and looters.
- Call S.O.S. to provide structure and content restoration.
